# Invitation

The unique concept of this 7th Advanced Musculoskeletal Ultrasound Course in Vienna, is the combination of ultrasound and clinical findings, including joint sessions for hand, ankle/foot, elbow and shoulder with a focus on structured explanation of ultrasound pathologies in the context of clinical appearance, examination and therapy.

Special modules are scheduled on Saturday, including pain management and inflammation. Nationally and internationally renowned experts in Radiology, Physical Medicine, Rheumatology and Orthopedics & Trauma Surgery, will teach the clinical aspects and indications for ultrasound, the specific pathologies and typical imaging patterns according to the ESSR guidelines for ultrasound examination.

Additional highlights of this course are the arthroscopical – pathological correlation of a cadaver shoulder with MRI and ultrasound findings, special case presentations and discussions, and a special and unique highlight being an outstanding dance performance by a brilliant and much admired ballet-dancer of the Vienna Opera House.

The live demonstrations and hands-on sessions on patients will give you confidence to practice advanced ultrasound examinations.

We are looking forward to you joining us at the interdisciplinary ultrasound course in Vienna.
